Best Practice

Regional Saturday Course now booking. 5 hour Web 2.0 course especially suitable for any teacher who is interested in creating and administrating a school website. The course is open to both primary and post primary teachers.

'Creating Your School Blog (using Scoilnet Blogs) will help you create and easily manage a blog for your school. Once created it will be easy for you to administer the blog and even easier to have the other teachers on the staff update their own pages with their class resources and their students' project work.

Details of the four venues are available in e-Links or speak to the ICT Administrator in your Education Centre.
